The Georgia Tech Scholars Program is designed to recruit and enroll academically talented students from across our state. Through this program Georgia Tech offers acceptance to valedictorians and salutatorians from Georgia high schools with more than 50 graduates.

We have an established commitment to partnering with Georgia’s K-12 schools to encourage more students to pursue higher education. While we are proud of our national and international initiatives, in order to fulfill our mission, it is critical to look for opportunities to ensure a close connection to our state. The Georgia Tech Scholars Program is an outgrowth of that vision.
By analyzing College Board test data, we determine which colleges in the United States our first-year prospects also applied for admission.

After students matriculate, we utilize National Student Clearinghouse records and national census data to determine where our students were also offered admission.

Georgia Tech is deeply committed to being a global leader in higher education and providing students with an international perspective. To this end, we make every possible effort to enroll a class that represents a diverse array of nations. Through consortium travel, communication initiatives, and staffing adjustments, as well as engaging current international students in the recruitment process, we’ve had great success in this arena. Our goal is to enroll students who will not only thrive academically but also contribute to the ethos of Creating The Next.

Creating the next
The Regents Engineering Pathway Program provides students within the state of Georgia an opportunity to apply and enroll at Georgia Tech through an articulated admission process. Students attend a participating institution for two years to complete required courses, then transfer to Georgia Tech to complete their bachelor’s degree from our College of Engineering. This partnership with institutions around our state serves to bolster their first-year enrollment, entering academic profile, and first-year retention rate.
Applicants denied first-year admission who have an immediate family member who is an alum or current Georgia Tech faculty/staff member are eligible to apply for admission through the Conditional Transfer Pathway Program. Students choosing this pathway attend another college or university for one year (30 semester hours), take specified courses, and earn a GPA of 3.3 or higher. Their offer of entry is then for the following fall term. This is a unique program that demonstrates Georgia Tech’s commitment to our alumni community.
First-year applicants who are not offered admission within the College of Design, Ivan Allen College of Liberal Arts, or College of Sciences may be given the opportunity to apply as a transfer student through the Sciences Transfer Pathway program.

The Arts & Sciences Transfer Pathway offer is valid for the Fall semester one year after beginning full-time college studies.

2019 was the first year this pathway was offered to both Georgia and non-Georgia students, which accounts for a large increase in the number of offers, applications, and enrollees.
Dual Degree students attend a participating Dual Degree institution for three years, then attend Georgia Tech for two years within one of the College of Engineering’s undergraduate degree programs. Upon completion of the engineering program, students receive a bachelor’s degree from their home institution, and a bachelor’s degree from Georgia Tech. Partner schools include several all-female and historically black colleges and universities.

Georgia Tech partners with high school and home study programs across the state to enroll students in advanced courses. Our program is designed for students who have exhausted the math and/or science classes in their high schools.

The majority of our Dual Enrollment students participate in our Distance Math Programs, through which they take classes with Georgia Tech professors through a live video feed. In 2019, students took advanced courses in Linear Algebra, Multivariable Calculus, Number Theory and Cryptography, Applied Combinatorics, and Differential Equations.

*Application numbers dropped from 2018 to 2019 as Genetics and Organic Chemistry were not offered in 2019.
Georgia Tech is committed to serving the state by providing Georgia’s best students with a world class education at one of the best values in American higher education.

- **74%** of our 2019 transfer class is made up of Georgia residents.
- We enrolled first-year students from **351** Georgia high schools.
- We partnered with University of Georgia and Georgia State University to host workshops reaching students and counselors around the state.
- Through the **Atlanta Public Schools Scholars Program**, we enrolled more valedictorians and salutatorians from that system than any other college in the country.
- Enrolled **160** Georgia residents through the Georgia Tech Scholars Program.

**Georgia**

- **2,861** ENROLLED
- **1,689** First-Year
- **677** Transfer
- **495** Dual Enrollment
Undergraduate Admission is the front porch of the Institute. Aside from GT Athletics, our office brings more constituents to campus than any other department or program at Georgia Tech. In order to deliver a personalized, brand-level experience, our staff works tirelessly along with student volunteers in the creation of events, publications, and presentations that will compel highly sought after students to choose Georgia Tech over their numerous other options.

- **586** Academic Information Sessions and Programs Offered.
- **503** Admission Information Sessions Offered.
- **136** college counselors hosted for programs.
- **62%** of enrolled first-year students attended an Office of Admission sponsored visit.

**30,000+** estimated students and parents hosted

**600+** campus tours provided

"The campus was warm, welcoming, and everyone I interacted with was helpful. Everything about my experience made me feel extremely welcome and as though I were already a part of the family."
